

Course Equivalency Guide
between Ashford University
and
Illinois Valley Community College

For the Catalog Year 2009-2010

Introduction

This Articulation Agreement formally recognizes that Ashford University and Illinois Valley Community College are active educational partners, committed to providing greater educational opportunities and services for students transferring between our institutions. This commitment strongly supports the concept of seamless transfer that embraces the principle that transfer students should not be required to repeat competencies already achieved.

Ashford University and Illinois Valley Community College enter into this Articulation Agreement in the spirit of cooperation and to mutually recognize each other as quality institutions of higher learning. Each institution is dedicated to serving students from diverse populations.

Purpose

The purpose of this Articulation Agreement is to enable Illinois Valley Community College students who transfer to Ashford University to carry with them the credit they have already earned for as much relevant study as possible. This Articulation Agreement provides a structure through which transfer articulation on all levels can be supported. The transfer guidelines outlined in this Articulation Agreement are applicable to students transferring to Ashford University from Illinois Valley Community College only.

Transfer Elements

Illinois Valley Community College graduates with a minimum cumulative GPA of 2.0 entering under the terms of this agreement are guaranteed admission into a Bachelor's degree program at Ashford University provided they meet all admissions requirements for the degree program. The transfer guides outlined in this Articulation Agreement are applicable to students transferring to Ashford University from Illinois Valley Community College during the Catalog year 2009-2010.

Under this agreement, Illinois Valley Community College students transferring with degrees accepted in bulk will have fulfilled all General Education requirements at Ashford University.

Illinois Valley Community College graduates will not have to repeat lower-division requirements at Ashford University except where major coursework applies. All credits are accepted and applied toward the appropriate university degree(s).

Illinois Valley Community College students transferring without an aforementioned degree will have all college-level academic credit, with a grade of C- or better, accepted for transfer on a course-by-course basis. They may be applied as either an elective, general education requirement, or an exemption or replacement for a required course where applicable.

Illinois Valley Community College graduates will go through Ashford University's transfer process and therefore must meet all applicable requirements and deadlines pertaining to application for admission, orientation and registration, and payment of tuition and fees. They will abide by the policies and procedures, along with any revisions thereof that apply to all students from that institution.

Credit Articulated for Upper Division Courses

Students who transfer lower-division credit towards upper division courses will satisfy content only. All students must successfully complete a minimum of 30 upper-division credits to graduate. Lower-division credits transferred to satisfy upper-division courses do not constitute completion toward the 30 upper-division credits required for graduation.

3+1 Program Offerings

The maximum number of transfer credits that can be accepted and applied toward degree completion is 99 credits, 90 of which can be from community colleges.

Note: The 99 credits in transfer policy applies only to Ashford University's College of External Studies, which offers online and campus accelerated degree programs. All other Colleges have a maximum transfer policy of 90 credits, of which all 90 credits can be from community colleges.

Transfer Credit Provisions and Limitations

A maximum number of 6 credits of Physical Education activity and 6 credits of Computer Applications may apply towards a Bachelor's degree at Ashford University.

Courses that meet more than one General Education Requirement can only be applied to one area. A course cannot apply more than once.

A maximum of 9 credits with a "D" grade are transferable as long as the student's cumulative overall GPA is 2.0 or above. "D" credits cannot be applied toward the major or toward General Education competencies.

Transfer credit may not be granted when it duplicates college credit previously earned. Credit will not be given for the same learning twice.

Graduate-level transfer credits cannot be applied to undergraduate degrees.

An (*) denotes a total of 3 semester credits are necessary to fulfill the related General Education requirement.

An (**) denotes that this science course must be accompanied by another 1 credit laboratory or 3 credit science course to fulfill the General Education requirement.

» Students must have a minimum of 30 upper-division semester credits to meet graduation requirements.

» Official transfer credit evaluation takes place once a student is enrolled at Ashford University and all official transcripts have been received.

» Courses that meet more than one General Education requirement or direct transfer can only be applied to one area. A course cannot apply more than once unless it carries the required credit.
